Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I: Claims 1-8 and 13, drawn to a subcombination of an insulating, multi-ply packaging material, classified in Class 383, subclass unknown.

Group II: Claims 9-12 and 14-20, drawn to a combination of a packaging system for products, classified in Class 206, subclass 594 and others.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed does not require face-to-face interfacing engagement with the flat surface or the temperature insulating. The subcombination has separate utility such as being used by itself as a sitting pad.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because by their different classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.

Art Unit: 3728
